

**W, J. Female AGE 45**

Patient presented to us with a diagnosis of Cervical Cancer. The patient is experiencing extreme fatigue and depression. She also complains of frequent urination that keeps her waking up at night. She has also experienced uncomfortable weight gain.

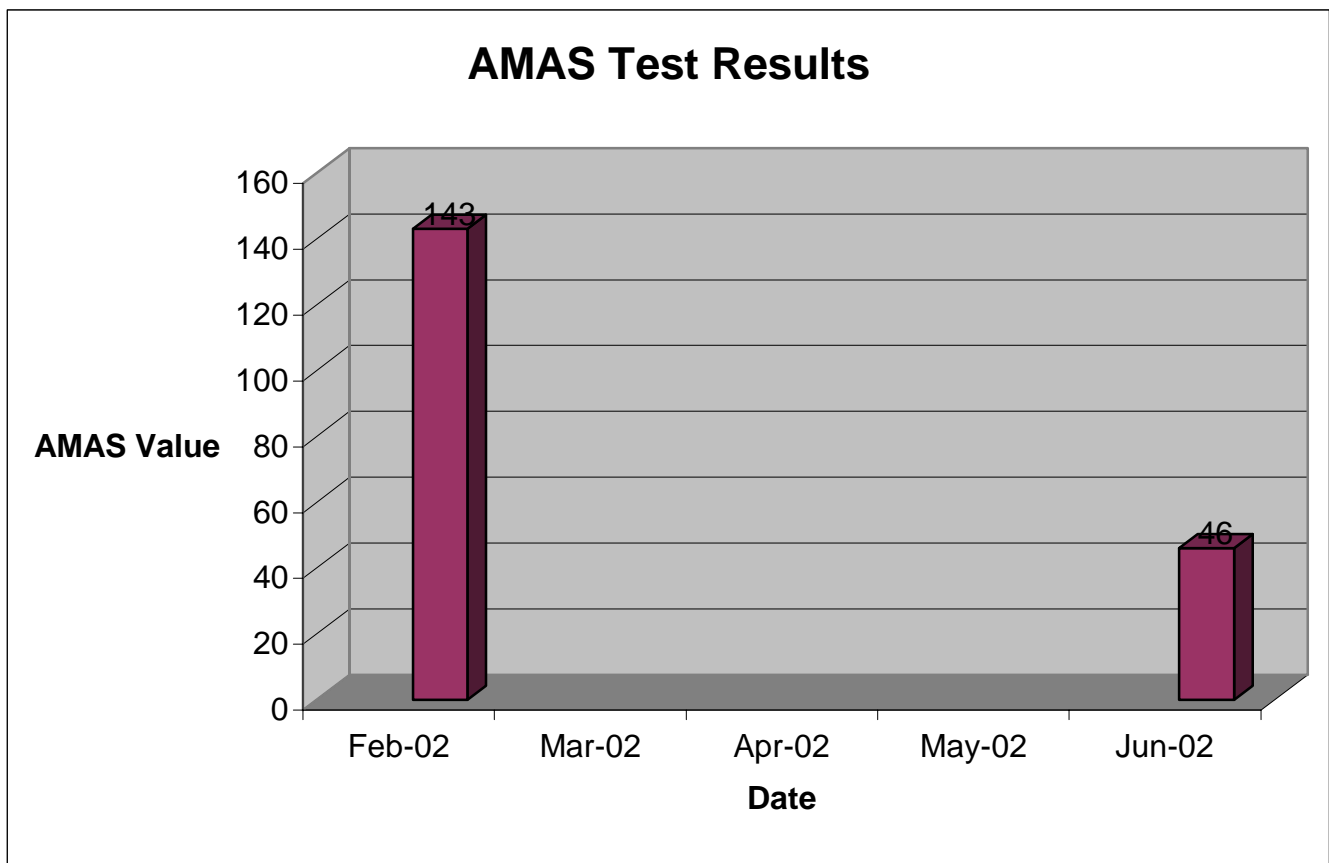

Following the start of the LifeOne Formula, energy levels have greatly improved. She has become more active within a few weeks, and her fat loss has been steady. The patient also states she is much less depressed and has a general sense of well being. Her urination has returned to normal frequency. Lab work shows a functional immune system

01/17/02 Abnormal PAP

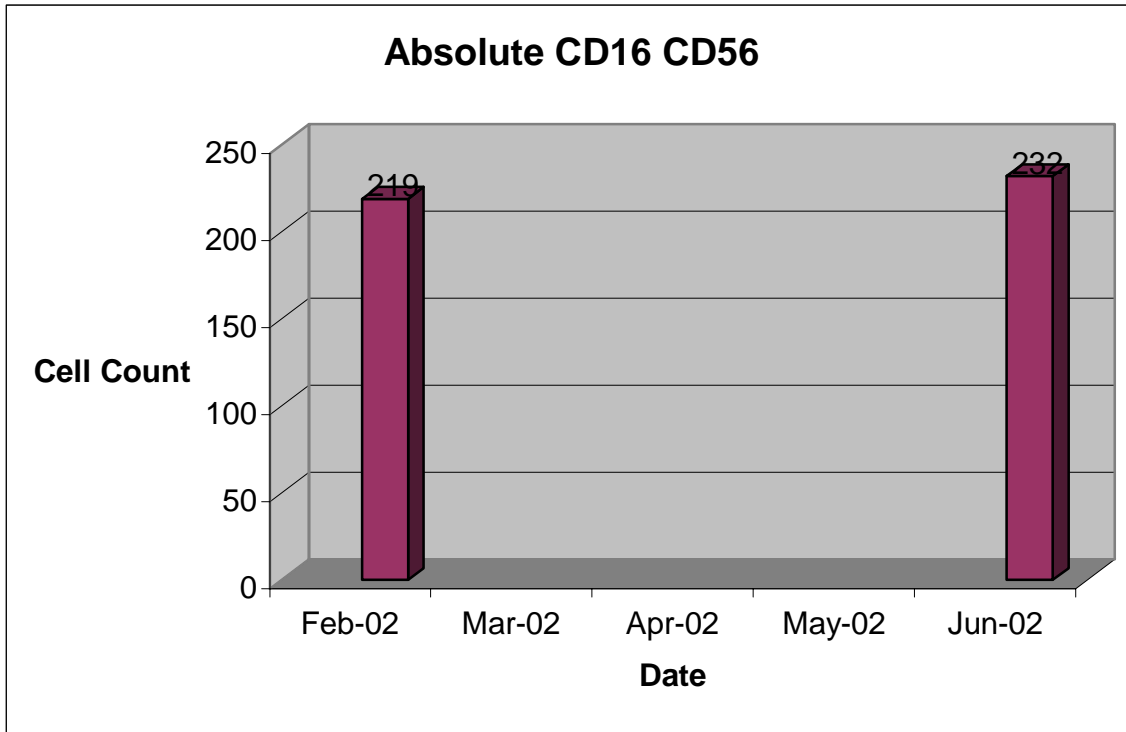

02/14/02 Cervical Cancer determined by biopsy.

02/12/02 Started LifeOne Formula

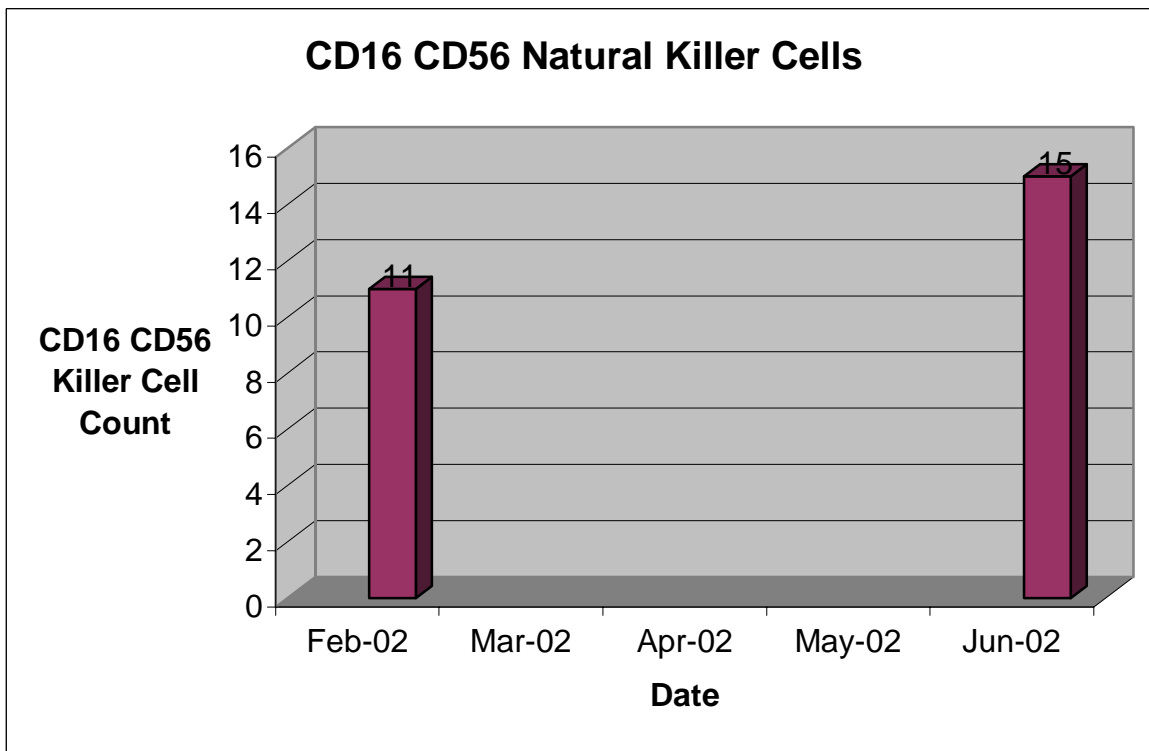

05/25/02 Pathology and biopsy follow up shows cancer is no longer present.

Normal Range <135

Normal Range 70-760

Normal Range 4-25

Natural Killer Cells are known to attack and destroy cancer cells. This particular cell type is very important in fighting cancer. This significant increase shows an important mechanism of action of the LifeOne Formula.
